

sc_core::sc_vector
::bind

sc_core::sc_vector
_assembly::bind

sc_core::sc_vector
_do_bind

```
graph LR; A[sc_core::sc_vector::bind] --> C[sc_core::sc_vector_do_bind]; B[sc_core::sc_vector_assembly::bind] --> C;
```

The diagram illustrates a function binding or override relationship. On the left, two white rectangular boxes represent source functions: 'sc_core::sc_vector::bind' (top) and 'sc_core::sc_vector_assembly::bind' (bottom). On the right, a gray rectangular box represents the target function 'sc_core::sc_vector_do_bind'. Two blue arrows point from the source boxes to the target box, indicating that both source functions are mapped to or override the target function.
