

sc_dt::sc_fxnum::is_zero

sc_dt::sc_fxval::is_zero

sc_dt::scfx_rep::is_zero

```
graph LR; A[sc_dt::sc_fxnum::is_zero] --> C[sc_dt::scfx_rep::is_zero]; B[sc_dt::sc_fxval::is_zero] --> C;
```

The diagram illustrates a relationship between three functions. On the left, there are two white rectangular boxes. The top box contains the text 'sc_dt::sc_fxnum::is_zero' and the bottom box contains 'sc_dt::sc_fxval::is_zero'. On the right, there is a gray rectangular box containing the text 'sc_dt::scfx_rep::is_zero'. Two blue arrows originate from the right side of the two white boxes and point towards the left side of the gray box, indicating that both 'sc_dt::sc_fxnum::is_zero' and 'sc_dt::sc_fxval::is_zero' are related to or perhaps delegate to 'sc_dt::scfx_rep::is_zero'.
