

sc\_core::sc\_vector  
\_assembly::bind

sc\_core::sc\_vector  
\_assembly::operator()

sc\_core::sc\_vector  
\_assembly::begin

```
graph LR; A[sc_core::sc_vector<br/>_assembly::bind] --> C[sc_core::sc_vector<br/>_assembly::begin]; B[sc_core::sc_vector<br/>_assembly::operator()] --> C;
```

The diagram illustrates a relationship between three functions. On the left, two white rectangular boxes with black borders contain the function signatures 'sc\_core::sc\_vector \_assembly::bind' and 'sc\_core::sc\_vector \_assembly::operator()'. On the right, a gray rectangular box with a black border contains the function signature 'sc\_core::sc\_vector \_assembly::begin'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both 'bind' and 'operator()' functions are associated with or point to the 'begin' function.
