

sc_core::sc_vector
::operator()

sc_core::sc_vector
_assembly::operator()

sc_core::sc_vector
_do_operator_paren

```
graph LR; A["sc_core::sc_vector::operator()"] --> C["sc_core::sc_vector_do_operator_paren"]; B["sc_core::sc_vector_assembly::operator()"] --> C;
```

The diagram illustrates a mapping from two different function calls to a single target function. On the left, there are two white rectangular boxes. The top box contains the text 'sc_core::sc_vector::operator()' and the bottom box contains 'sc_core::sc_vector_assembly::operator()'. On the right, there is a gray rectangular box containing the text 'sc_core::sc_vector_do_operator_paren'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both functions map to the same target.
