

tlm::tlm_base_target
_socket::bind

tlm_utils::multi_passthrough
_target_socket::get_base_export

tlm::tlm_base_target
_socket_b::get_base_export

```
graph LR; A["tlm::tlm_base_target_socket::bind"] --> C["tlm::tlm_base_target_socket_b::get_base_export"]; B["tlm_utils::multi_passthrough_target_socket::get_base_export"] --> C;
```

The diagram illustrates a dependency or mapping between two source components and a target component. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'tlm::tlm_base_target_socket::bind'. The bottom box contains the text 'tlm_utils::multi_passthrough_target_socket::get_base_export'. On the right, there is a gray rectangular box with a black border containing the text 'tlm::tlm_base_target_socket_b::get_base_export'. Two blue arrows point from the right side of each white box to the left side of the gray box, indicating a relationship or mapping from the source components to the target component.
