

SvgLinkParser::SvgLinkParser

```
graph LR; A[SvgLinkParser::SvgLinkParser] --> B[SvgLinkParser::generate_tree]; B --> B;
```

The diagram illustrates a call to the `generate_tree` method from the `SvgLinkParser` constructor. It consists of two rectangular boxes. The first box, on the left, is white with a black border and contains the text `SvgLinkParser::SvgLinkParser`. The second box, on the right, is gray with a black border and contains the text `SvgLinkParser::generate_tree`. A straight blue arrow points from the right side of the first box to the left side of the second box. A curved blue arrow originates from the top of the second box and points back to its top, representing a self-call or a recursive step.
