tlm_utils::multi_passthrough
_target_socket::size

tlm_utils::multi_passthrough
_target_socket::get_hierarch_bind

```
graph LR; A["tlm_utils::multi_passthrough<br/>_target_socket::end_of_elaboration"] --> C["tlm_utils::multi_passthrough<br/>_target_socket::get_hierarch_bind"]; B["tlm_utils::multi_passthrough<br/>_target_socket::size"] --> C;
```

The diagram illustrates a mapping or dependency. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'tlm_utils::multi_passthrough_target_socket::end_of_elaboration'. The bottom box contains the text 'tlm_utils::multi_passthrough_target_socket::size'. On the right, there is a single gray rectangular box with a black border containing the text 'tlm_utils::multi_passthrough_target_socket::get_hierarch_bind'. Two blue arrows point from the right side of the two white boxes to the left side of the gray box, indicating that the two functions on the left are associated with or mapped to the function on the right.
