```
graph LR; A[sc_boost::basic_string_view::find_last_not_of] --> D[sc_boost::basic_string_view::find_last_not_of]; B[sc_boost::basic_string_view::find_last_not_of] --> D; C[sc_boost::basic_string_view::find_last_not_of] --> D;
```

The diagram illustrates a merge or consolidation process. On the left, there are three separate boxes, each containing the text 'sc_boost::basic_string_view::find_last_not_of'. Blue arrows point from each of these three boxes to a single, larger box on the right that also contains the same text. The target box on the right has a gray background, while the source boxes on the left have a white background.
