convertToDoubleVector

```
graph LR; A[MultiTypesChrono::MultiTypes Chrono] --> D[convertToDoubleVector]; B[MultiTypesChrono::MultiTypes Chrono] --> D; C[MultiTypesChrono::MultiTypes Chrono] --> D;
```

The diagram illustrates a data flow or transformation process. On the left, there are three identical rectangular boxes, each containing the text "MultiTypesChrono::MultiTypes Chrono". On the right, there is a single, wider rectangular box with a gray background, containing the text "convertToDoubleVector". Three blue arrows originate from the right side of each of the three boxes on the left and point towards the left side of the gray box on the right, indicating that the contents of the three boxes are being processed or converted by the function named in the gray box.
